CORRIGENDUM-II

for

Tender Notification No.: 25SP254T; Dated 10/12/2025

Tender for Design, Development, and Implementation of Inventory Management System, including integration with the existing platform and With a one-year AMC for IIM Tiruchirappalli.

The following changes have been made through this Corrigendum-II to the above Tender:

Tender Reference	Clarification/Amendments to
New Clause	The bidders should demonstrate similar applications developed at any academic institute.
New Clause	The successful bidder should deploy the programmers at IIM Tiruchirappalli for the system study, study of db structure, integration with existing php/MySQL applications, and for hosting of application.
New Clause	Remote access to database or c-panel access will not be provided during the development phase.
New Clause	The backend platform must use our existing technologies (PHP/MySQL, CodeIgniter, etc.). Other platforms will not be accepted. The Inventory Management System (IMS) should be added as a new menu within the existing EMS application. The same login interface and URL will be used to access all current modules and the new IMS.

All other points mentioned in the Tender document, other than the above Corrigendum, will remain the same.
